### **INTERVIEWING THE INTERVIEWER held on 5 December 2019**

'Interviewing the Interviewer'- a talk on how to answer an interview led by Mr. Ryan Lobo was organized in the Fr L.F. Rasquinha Hall in the LCRI Block.

Mr. Ryan in his talk emphasized on the need for not only knowledge, but also competence in capitalizing one's opportunities during their recruitment process. As Mr. Ryan continued on the different stages of the recruitment process – from the Aptitude tests to Group Discussions to Interviews, the audience got insights into what is truly expected of them as an interviewee.

Mr. Ryan's rich industry experience added to the audience's benefit as his talk involved a Q&A session to clarify the doubts of the students.

Mr. Ryan's talk concluded with a Mock Interview with a student volunteer, to help the students understand the interviews better.

Among the audience were the Final Year students of the B.Com, BBA, B.Sc and BA course.

## COMMERCIO-2019 SECOND PHASE

### Tally Rally held on 6 December 2019

Tally Rally'- a balance sheet tally event with a twist, was conducted by the CORE of the Commerce Association in AR802 and AR803.

The main objective of this event was to fill a half-filled balance sheet with answers that participants had to de-

duce from certain equations provided to them. The event involved 4 participants from each class of B.Com from all years.

The participants were provided with mathematical and accounting equations on one end of the hall which they were required to solve individually, and hence communicate the answer to the next participant in line until the last participant writes down the answer on a half-filled balance sheet at the other end of the hall. After one such transition was complete, the last participant had to run

back to the start to solve another equation and communicate it to the next participant in line, who had to move a step further in the lane, and the cycle continued until any team completed the balance sheet within the specified time limit.

Thus, this event tested the ability of the participants to solve mathematical and accounting equations based on previously learned concepts with proper teamwork and strategy within a time limit, while also being stressed with physical tasks such as running and going through the obstacles.
