Bird Box Making

*President- Dr. Sana Sheik, Dept Of Botany
Secretaries- Swaroop Kumar Vs – II BSc (BcBZ),
SHREYA – IIBSc (BcCZ)*

The Bioscience Association is back to offline mode! The second year students of the association conducted the activity of bird box making on November 26, 2021.

Bird populations, especially sparrows and other passerine birds, are declining due to rising urbanization and the destruction of their natural habitats. Due to this, many of them end up in urban areas with hardly a few trees and nesting areas. With their declining natural habitats, bird houses or nest boxes offer a good option for their survival, by providing birds with a place to rest and raise their young. A bird box is a human-made, usually wooden box which is used as a house for birds. It is suitable as a bird house because it is similar to the natural occurring

bird houses, such as a hollow tree and birds often make nests inside bird boxes. Bird boxes provide a safe and secure location to lay eggs. All second year student mem-

bers of the Bioscience Association involved themselves enthusiastically in making these bird boxes. Total of 8 bird boxes were distributed across selected shops that caught sight of sparrows around the city.

Continuing the meaningful tradition of promoting inter-religious harmony, St. Aloysius College (Autonomous) organised 'Deepavali Celebration' – the feast of lights, on Thursday, 4th November, 2021 in the Robert Sequeira Hall, LCRI block. Dr. Ismail N, former

Principal, Badriya PU College and Secretary of Mahatma Gandhi Peace Foundation; Mr Roy Castelino, PRO, Mangalore Diocese; Shri Ranjan Bellapardi, Co-ordinator, Ramakrishna Mission, Mangalore were the Chief Guests. Rev. Dr. Praveen Maris SJ, Principal presided over the programme.

It was followed by a mesmerizing welcome dance performed by Samskriti and team. The cultural programme ended with a melodious and lilting song by Nandini Ganiga and team that evoked the importance of dispelling darkness and spreading knowledge and love all round, especially with the less fortunate. The programme was inaugurated symbolically by lighting the Lamp and Diyas by the dignitaries on the dais.

Dr. Ismail in his speech said, "We have traversed a long journey from the ancient practices and have reached the times, when we give importance to humanity and harmony. This Diwali festival and such other events develop harmony among people. Let us not support any activities which promote violence and disturb harmony. When we

lit the light today, it was not just for one or two days, but for every day and every moment of our lives. India is a land of harmony."

Speaking on the occasion, Sri Roy Castelino said, "Diwali is one of the biggest and auspicious festivals celebrated

by Hindus all around the globe. The message of Diwali is relevant to everyone, regardless of your faith or background: goodwill always prevail over evil, light over darkness and friendship over enmity. Wherever He went he was a source of inspiration."

NCC Air Wing Cadets of St Aloysius College take up Tree Plantation to Mark NCC Day

“Save trees, live an active lifestyle.” Tree planting is the process of planting tree saplings generally for forestry, land reclamation, or landscaping purposes. It differs from the plantation of larger trees in arboriculture, and the lower cost but slower and less reliable distribution of tree seeds.

Trees contribute to the environment over a long period of time by providing oxygen, improving air quality, also improves climate, conserving water, preserving soil, and supporting wildlife. During the process of photosynthesis,

trees take in carbon dioxide and produce the oxygen we breathe. It is the need of the hour to plant trees to cope up with the present situation wherein pollution is a rising concern.

NCC day is celebrated on the fourth Sunday of November every year. The cadets of 6 Kar Air Squadron NCC, took upon the responsibility of planting the trees at

their residence, on November 22, 2021 to commemorate NCC day. 42 Air wing cadets participated in the activity under the guidance of the ANO, Flying Officer Alwyn Stephen Misquith by planting the saplings, and shared the images of the same.

He also explained how blood helps patients suffering from life-threatening conditions and supports critical medical and surgical procedures. "Donating is a safe process and people should not hesitate to give or receive blood. At Wenlock Hospital we have implemented additional precautions to ensure the safety of the donors and staff. This blood shortage could

impact patients who need surgery, victims of accidents and other emergencies, or patients fighting blood cancer. I am happy to see many of you cadets and NCC Officers have come forward to donate blood", he added. Dr. Alwyn D'sa in his address said, "I feel proud to say that

St Aloysius College is the only institution under Mangalore University having the three full-fledged NCC Wings, and it is overwhelming to note that a large num-

ber of the NCC cadets have come forward to donate blood. St Aloysius College has the vision and mission of "Creating Men and Women for and with others", who in turn will be the agents of change in forging an eco-friendly and gender-sensitive society."
